

Accelerate Gender Equality in the Energy Sector

Assisting Public Expenditure Quality and Efficiency

Circular Economy in Municipalities of Chile

Contribute to strengthen the capacities of the MSPBS to respond to events of national and international public health importance (ESPII or ESPIN), taking the recommendations of the International Health Regulations (IHR). It will seek to support strategic activities that allow reducing negative impacts in terms of quality of life and loss of life, as well as in the economy, strengthening preparedness and response to eventual risks.

Contribute to the implementation of policies that lead to the reduction of extreme poverty of households in Honduras in the areas of financing, monitoring and evaluation, information technology and digital transformation.

Digital and Regulatory Tools to Support Economic Recovery

Fiscal Policy and Public Investment

Governance and Financing for Climate Action in Colombia

Human Resource Support for the Implementation of Labor Reform in Mexico

Implementation Support to the Program Toward a Green Economy (CR-L1147)

Improvement of the social protection system in Peru

Institutional Strengthening of Social Protection Policies in Honduras

Institutional Strengthening of the Ministry of Finance for Public Sector Transformation

Operation Support to Design Policies for Social and Productive Inclusion of People with Disabilities

Operational support to the Transparency II Program with Paraguay

Preparation of the strategy for the modernization and updating of the Paraguayan Ministry of Agriculture and Livestock

Program to Promote Inclusive Infrastructure

Program to Strengthen Fiscal Sustainability for Economic Development in Suriname

Promotion for the Development of a Green Hydrogen Market in Chile

Since 2017, the Government of Mexico has undertaken a series of ambitious constitutional and secondary reforms to improve labor justice and union democratization. These reforms have the potential to create the structural change necessary to significantly increase the quality of jobs in the Mexican labor market. In this context, this TC will address two strategic areas: (i) it will create and validate a flexible in-person and/or distance training program for Ministry of Labor staff who will be responsible for the operations of the new labor justice processes; and (ii) it will support the execution of this training program for all government officials identified by the Ministry of Labor.

Strengthen the overall capacity of the Paraguayan government to develop mechanisms and implement public policies in accordance with international standards and best practices on transparency and integrity towards a more efficient administration of resources.

Strengthen transparency policies in Paraguay in line with the operation PR-L1180 "Program to Support the Transparency Agenda in Paraguay II". Specifically, the TC will (i) strengthen gender equity and diversity policies and (ii) build evidence on the effectiveness of the use of technology in promoting transparency.

Strengthening of the Transparency and Integrity Agenda in the Use of Public Resources in Honduras.

Strengthening the Capacity for the Promotion of Competitiveness and Economic Diversification

Strengthening the Capacity of the Colombian Health Sector and Access to Health Services for Migrants in the Context of COVID-19

Strengthening the Processing Process for Productive and Sustainable Investment Projects

Strengthening the capacity of the Ministry of Finance for the design and implementation of key public policies included under the Public Sector Reform Support Program. In particular, the technical cooperation will provide technical assistance in the design of critical cross-sector policies which fall under the mandate of the Ministry of Finance.

Support for Better Regulation and Trust in Government

Support for Fiscal Institutionalility

Support for Reforms in the Water, Sanitation and Energy Sectors

Support for Third Stage of the Electricity Sector Sustainability and Efficiency Program

Support for a Fair, Clean and Sustainable Energy Transition II in Chile

Support for a Fair, Clean and Sustainable Energy Transition in Chile

Support for policy reforms and implementation of Nature-Based and Climate-Smart Agriculture Solutions that contribute to Costa Rica's National Decarbonization Plan

Support for policy reforms for the social and economic inclusion of the Venezuelan migrant population in Colombia

Support for the Competitiveness and Sustainability Program for the Resilience of the Tourism Sector in Panama

Support for the Development of the National Hydrogen Strategy towards a Decarbonized Economy

Support for the Implementation of Labor Reform in Mexico

Support for the Preparation of the Policy Reform Program of the Water, Sanitation, Solid Waste and Water Resources Sectors

Support for the Preparation of the Reform Program for Water and Sanitation Services in Tegucigalpa

Support for the Prevention Strategy against the trafficking and smuggling of migrants in Colombia

Support for the Response of the Government of Ecuador to Protect Social Spending and Job Recovery

Support for the Strengthening of Health Surveillance in Paraguay

Support for the Strengthening of the Public Agricultural Services in Paraguay

Support for the development of the Mobility Reform Program, Land Transportation and Road Safety in the Dominican Republic

Support for the preparation of the Sustainable Growth and Resilience Program

Support in the Preparation of the PBL for Productivity and Competitiveness Reforms

Support studies for the formulation of the resilient and sustainable production policy in Colombia

Support the financial sustainability of the electricity distribution, defining a tariff and subsidy framework that contribute with the improvement in the operational efficiency of companies and protect the purchase power of the most vulnerable group of users. In close coordination with the counterpart, it is expected that this Technical Cooperation will generate empirical and practical evidence that will contribute to the implementation of the components of the DR-L1146 Program.

Support the implementation of Climate Smart Agriculture Policy Reforms in Costa Rica.

Support the implementation of policy commitments defined by operations CH-L1164 and CH-L1166, the scaling up of the Recycling Fund and the National Strategy for Organic Waste Management in municipalities of Chile.

Support the implementation of the Program to support the quality of social spending

Support to Fiscal Management

Support to Fiscal Policy and Management in Guyana

Support to Public Policies for the New Economy in Paraguay

Support to Strategies to Reduce Chronic Malnutrition and Promote Early Childhood Development in Ecuador

Support to Transport and Logistics Reform Program

Support to the Digital Transformation and Sustainable Growth Program

Support to the Implementation of the Program to Support Gender Equality Policies - Phase I

Support to the Implementation of the Program to Support Gender Equality Policies - Phase II

Support to the Institutional Strengthening in Science, Technology, Knowledge and Innovation

Support to the Program for Public Policies for Sustainable and Resilient Growth in Argentina

Support to the reforms agenda that strengthen Colombia's integration into global value chains and boost economic recovery

Supporting State-Owned Enterprises Reform in Ecuador

Supporting the Integrity Agenda in Paraguay

Sustainable Development Planning

The Government of Peru has requested an operation to Support Policy Reforms, under the programmatic modality, to increase productivity and competitiveness (PE-L1244). This loan amounts to US \$ 50 million from the resources of the Ordinary Capital, and constitutes the first of two possible operations technically linked to each other, but financed independently. The objective of this technical cooperation is to support the development of a series of policy reforms aligned with this operation necessary for the fulfillment of its objectives of increasing productivity and competitiveness through the design and implementation of public policies aimed at: (i) strengthening the institutional framework for competitiveness; (ii) improve the business environment for investment, and (iii) improve the business environment for innovation.

The aim of the TC is to finance the associated costs to complete the compliance and implementation of the reforms agreed in the first operation (BO-L1200) of the "Program of Policy Reforms for the Water, Sanitation, Solid Waste and Water Resources Sectors in Bolivia" and the preparation of its second operation of the PBP, which is expected to be approved in 2021; includes consulting and non-consulting services necessary for the development and implementation of sector reforms, together with technical support and advice to the beneficiary (MMAyA), for the preparation of operations and the achievement of sector reform commitments/policies. The TC will finance individual consultancies to provide technical assistance and supervision to the Ministry of Environment and Water and its autonomous, decentralized entities, from the preparation to the approval and implementation of the products derived from the reforms, together with compliance with the approval and disbursement requirement of the Program, non-consultancy services for the edition, publication and dissemination of materials according to the requirements of the sector. The TC will also finance basic studies for the elaboration of guidelines, plans and policies for prioritized subsectors, such as services in rural areas, rainwater drainage, urban solid waste and others.

The general objective of the TC is to assist the recovery from the health and fiscal crisis brought about by the COVID-19 pandemic, through strengthening the efficiency of public expenditure and the financial management of the public sector. The specific objectives of the TC are: i) to support the strengthening of the budget formulation system, and ii) assist the implementation of the Single Treasury Account.

The general objective of the TC is to assist the recovery from the health and fiscal crisis brought about by the COVID-19 pandemic, through support to fiscal stability in Uruguay and to improvements to the efficiency of public expenditure. The specific objectives of the TC are: i) to support the development of the systems for the evaluation of public policy and expenditure

programs; ii) support the strengthening of the national public investment system; and iii) support the development of macro-fiscal management institutions.

The general objective of the TC is to support the government of Costa Rica (CR) in the development of the green hydrogen market, in line with the Decarbonization Plan (PD) 2018 - 2050, to reverse the increase in greenhouse gas emissions , and promote economic development and generate employment. The specific objectives are to support CR in: (i) developing a national green hydrogen strategy, and a roadmap that describes the long-term advantages, opportunities, and benefits of producing it; and (ii) identifying the existing gaps for its development, actions, and schedule to move forward with the next steps.

The general objective of the Technical Cooperation (TC) is to support the Government of Colombia (GoC) in the formulation of policies and regulations for the adoption of Climate-Smart Agriculture (ACI) practices, which contribute to increasing the productivity of the agricultural sector and strengthening its adaptation and mitigation measures to climate change CC. The specific objectives are: i) support the formulation of the sustainable livestock action plan iii) strengthen the capacities of the sustainable livestock tables ii) support the development of the necessary regulations for the institutionalization and operation of the Agricultural Technical Tables (MTA) and iv) support the issuance of regulations that establish guidelines to design, train, and implement reconversion programs for high-impact agricultural activities in delimited moorlands. TC is developed in support of compliance with policy measures registered in the CO-L1264 program for Sustainable and Resilient Growth.

The general objective of the operation is to support the strengthening of public agricultural services in Paraguay. The specific objectives are: i) to develop technical, operational and institutional studies for the design, preparation, approval and initiation of the Project for the Improvement of Research, Innovation and Transfer of Agricultural Technology (PR-L1162); and ii) analyze aspects of the public institutionality of the system that may be affecting the development of the agricultural sector.

The general objective of this TC is to contribute to the strengthening of the institutional capacities of the Secretary of Economy for the promotion of a better business environment in Mexico.

The general objective of this cooperation is to provide technical, legal and administrative support to the Ministry of Environment and Sustainable Development for the development of regulations, strategies, guidelines, plans and instruments that allow the adoption and implementation of responsible environmental policies that contribute to sustainable growth and resilience of the country, within the framework of the CO-L1264 program.

The general objective will be to contribute to improve and increase access to water, sanitation and electricity services in the country through the consolidation of the reform process aimed at improving sector governance and service management. The specific objective is to support the development of the policy measures included in the policy matrix of the future operation.

The main objective is to provide technical support to the Ministry of Finance in the comprehensive review of public spending, public employment and strengthening the implementation of electronic invoicing. The Government of Costa Rica has been making efforts to correct its fiscal imbalance. Specifically, the country has completed the approval process of a fiscal reform that includes

measures for both the revenue side (changes in VAT and Income Tax) and the expenditure side (more control in wage bill and earmarked expenditure), as well as the implementation of an expenditure fiscal rule. The IMF estimates a return of around 4 percentage points of GDP (2023-2018) as a result of this policies. As a continuation of the efforts to stabilize public finances, the government requires support in the review of the expenditure and the implementation of the Electronic Invoice, specifically the tax risk analysis derived from this tool. The specific objectives are: (i) formulate, in coordination with the General Directorate of Taxation, the design and application of a methodology for tax risk analysis with the Electronic Invoice databases; (ii) support the implementation of the reform in public employment through occupational and market studies; (iii) determine the design of an institutional reengineering, in accordance with the implementation of a Zero-Based Budgeting (ZBB) for the public sector.

The main objective of this TC is to support the institutional strengthening of the recently created Ministry of Science, Technology, Knowledge and Innovation through: (i) strengthening of the technical capabilities of the Ministry; (ii) design and implementation of a monitoring and evaluation system and (iii) diffusion and awareness activities.

The main objective of this Technical Cooperation ("TC") is to favor the increase of investment to contribute to the sustained and sustainable growth of the Chilean economy. In particular, it is expected that the activities of this TC contribute to developing a modern and efficient public institutionality for the processing of investment projects, respecting current social and environmental standards.

The main objective of this technical cooperation is to strengthen institutional capacities that contribute to promoting Panama's sustainable economic growth through improvements in the country's competitiveness and the promotion of emerging sectors. This cooperation is of operational support, contributing to the fulfillment of the execution of the Program for the Promotion of Competitiveness and the Diversification of the Economy (4899 / OC-PN) regarding activities that help promote sustainable growth; through improving the country's competitive conditions with the promotion of a digital environment favorable to business and the strengthening of the national quality system. This project will follow up on the indicative commitments proposed by the first loan operation in the programmatic series based on policy reforms. The products of this cooperation complement Technical Cooperation No. PN-T1197 called "Support for the Creative and Cultural Ecosystem of Panama" which is intended to promote and support economic activities of one of the emerging sectors to be promoted and which are those based on creativity, culture and innovation.

The main objectives of this Technical Cooperation (TC) are: (i) support the development of regulations for the application of current mobility Law 63-17, (ii) structure and implement action plans aimed at the development of the Sustainable Urban Mobility Plan (PMUS), (iii) support the integrated collection system for urban transport, (iv) support the strengthening of the "Mobility and Transportation Trust" (FIMOVIT) as an instrument for integrating the public transport network tariff and as a mechanism for financing clean fleets (electric vehicles); and (v) strengthen the institutional capacity of the National Institute of Transit and Transportation (INTRANT), as the key management institution for the sector. In close coordination with the counterpart, this TC is

expected to generate empirical evidence and support the design and fulfillment of the actions contemplated in the components of the DR-L1140 Program.

The objective is to contribute to the reduction of the transaction and regulatory compliance costs that citizens and businesses in Mexico must face through the strengthening of National Commission for Regulatory Improvement (CONAMER) capabilities. The specific objectives are: (i) to advance in the consolidation of the National Catalog of Regulations, Procedures and Services (CNARTyS); (ii) to support the design of the Electronic Document for Procedures and Services, and; (iii) to promote the implementation of the Law on the Promotion of Public Trust (LFCC).

The objective is to support the Government of Peru with the design of policy measures aimed at improving access and quality of basic social services

The objective is to support the development of the social protection and health policy measures pursued by the Program to Support the Quality of Social Spending (GU-L1183), which aims to improve the quality of life of the most vulnerable population in Guatemala through improvements in the quality of social protection and health care spending.

The objective of the TC is to contribute to improving Honduras' logistical performance through sectorial reforms in the regulatory, institutional, planning and trade facilitation areas, which will allow gains in regional competitiveness and integration, supporting Honduras' transport sector in the preparation and implementation of Phase II of the Transport Sector Policy Reform Program (HO-L1206), by financing key activities and consultancies for the design of the necessary actions to support the PBL (Policy Based Loan) targets, allowing the disbursement of its resources.

The objective of the TC is to support the development of a series of policy reforms and programs aligned with operation PBL CO-L1268, necessary to fulfill its objective of strengthening Colombia's integration into global and regional value chains to promote economic reactivation and job recovery. Specifically, it will promote (i) the improvement of the business climate to attract efficiency seeking foreign direct investment; (ii) the deepening of trade facilitation and integration strategies to improve the country's competitiveness in international markets; (iv) the productive and export reactivation of the business sector for its effective insertion in the global value chains.

The objective of the TC is to support the execution of the loan Support for the Protection of Social Expenditure and the Recovery of Employment (EC-L1273), which aims to improve the quality of life of the population, through the improvement in coverage, targeting and / or quality of priority social programs and the implementation of measures to support job recovery.

The objective of the TC is to support the execution of the program " Digital Transformation and Sustainable Growth" in Chile. The specific objectives are: (i) support the execution of the results-based loan (CH-L1166); and (ii) support the implementation of evaluation of policies included in the programmatic policy based loan (CH-L1164).

The objective of the TC is to support the government of Paraguay in the design and implementation of digital reforms for the improvement of connectivity and the digitalization of its economy.

The objective of the TC is to support the Programme to Strengthen Fiscal Policy and Management in Response to the Health and Economic Crisis Caused by COVID-19 in Trinidad and Tobago (TT-L1058). This TC will address the specific fiscal and economic needs derived from the pandemic.

The objective of the operation is to support the implementation of policies under the second tranche of the Programmatic Loan (CO-L1272), in order to contribute to the effective socioeconomic integration of Venezuelan migrants in Colombia. The specific objectives of this technical cooperation are: (i) support information management, through the strengthening of mechanisms for budget planning within the Ministry of Finance and Public Credit, and the operation of the Migration Statistics Bureau (conditions 2.2.4 and 2.2. 5); (ii) Expand the access of Venezuelan migrants to education, by updating the Instructions for the care of children and adolescents from Venezuela in Colombian Educational Establishments (condition 3.2.3); and (iii) Promote the recognition of labor competencies of the Venezuelan migrant population, supporting the process of validation of higher education degrees of the Venezuelan population residing in Colombia. (Condition 4.2.1). Description of the associated loan. This technical cooperation (TC) is associated with a loan operation based on a program for the development and implementation of public policies, under execution, whose general development objective is to contribute to the effective socioeconomic integration of Venezuelan migrants in Colombia. The specific objectives of the loan operation are: (i) expand regularization and information management of the Venezuelan migrant population; (ii) expand Venezuelan migrants' access to social services and protection against human trafficking; and (iii) promote the recognition of labor competencies of the Venezuelan migrant population. The operation approved the first programmatic loan in 2021, and is currently in the execution and policy implementation stage.

The objective of the technical cooperation (TC) is to support the preparation of the Program for the Reform of Water and Sanitation Services of Tegucigalpa (HO-L1207) in Honduras. This TC will contribute to the sustainability of the provision of water and sanitation services in Tegucigalpa through the financing of studies, plans and strategies to consolidate the transfer of services from the central level to the municipal level and strengthen the municipality with tools that allow you to increase the efficiency, quality and coverage of water supply and sanitation in the city.

"The objective of the technical cooperation is to support the national government in the implementation of actions to mitigate gender-based violence (GBV), human trafficking and migrant smuggling through: (i) Strengthening of instruments for the formulation and implementation of Territorial Action Plans (PAT); (ii) Adaptation of prevention campaigns and dissemination of PAT and attention routes to GBV and (iii) Institutional strengthening for the response to migrant smuggling.

Similarly, the TC seeks to implement the second tranche of the Programmatic Loan (CO-L1272), supporting the country's efforts to combat the vulnerability factors associated with the trafficking and smuggling of migrants"

The objective of this TC is to support the governments of the Latin American and Caribbean (LAC) region to advance towards a more inclusive infrastructure, in particular transport, water and sanitation and energy. This can be done through the inclusion of universal accessibility standards in the infrastructure projects, providing training and educational programs for People with Disabilities

(PwD) to promote labor inclusion. The specific objectives of this TC are: (i) to provide technical support to national and local executing agencies in the design and implementation of inclusive infrastructure and energy projects; (ii) support executing agencies and governments in the adoption and implementation of public policies that promote the inclusion of PwD; and (iii) to provide training for the executing agencies (national and local) to implement innovative initiatives to advance in a more inclusive sector.

The objective of this TC is to support the policy reforms related to the National Decarbonization Plan of Costa Rica (PD) and its implementation, in the themes of Nature-Based Solutions and Climate Smart Agriculture. The support will be through: (i) updating the regulatory framework for Nature-Based Solutions to encourage decarbonization through: (a) updating forest regulations to increase forest cover and (b) updating policies for the preservation of ecosystems with high content in carbon (mangroves); (ii) support for the design of new mechanisms for Payment for Ecosystem Services; and (iii) the development of Climate Smart Agriculture by: (a) deepening the implementation of the Nationally Appropriate Mitigation Action (NAMA) in a strategic sector, as well as the design of NAMAs and their respective pilots for new agricultural sectors; and (b) development of the Agro-environmental Agenda.

The objective of this Technical Cooperation (TC) is to support the Government of Ecuador in the design, implementation and/or monitoring of strategies aimed at improving the nutritional status and early childhood development (ECD) outcomes of children under 5 years-of-age in the country, thus improving their wellbeing. In doing so, this TC will fund activities to (i) support the intersectoral coordination role of the Technical Secretariat Ecuador Grows without Chronic Malnutrition (Secretaría Técnica Ecuador Crece Sin Desnutrición, or Technical Secretariat hereafter); (ii) develop a comprehensive behavioral change strategy that promotes best infant and young children feeding practices among vulnerable populations served by the Ministry of Health (Ministerio de Salud Pública, MSP) and the Ministry of Economic and Social Inclusion (Ministerio de Inclusión Económica y Social, MIES) and monitor its progress; and (iii) design and implement a module to collect ECD outcomes as part of the 2022 National Survey of Child Malnutrition (Encuesta Nacional de Desnutrición Infantil, ENDI), collected by the National Institute of Statistics and Census (Instituto Nacional de Estadísticas y Censos, INEC) and institutionalize the collection of developmental data alongside that of data on children's health and nutritional status since all three are essential and integral components of children's wellbeing.

The objective of this Technical Cooperation (TC) is to support the development of a green market for hydrogen as a future innovative and competitive energy source which will contribute to decrease greenhouse gas (GHG) emissions and accelerate the decarbonization process.

The objective of this Technical Cooperation is to support the Government of Colombia in the development of policies and regulations regarding governance, planning and financing of climate action, in line with the new NDC under the Paris agreement and E2050. The specific objectives are: (i) to develop or update national policies and strategies on governance and climate finance, in line with the priorities of Policy Based Program CO-L1264; (ii) strengthen technical and legal capacities of national entities such as the Ministry of Finance and Public Credit, the Ministry of Environment and the National Planning Department (DNP), to carry out prioritized policy and regulatory reforms.

The objective of this Technical Cooperation is to support the design and initial implementation of regulatory and institutional reforms of the Government of Barbados aimed at promoting sustainable development in areas that include development planning, resilient construction, and water resource management.

The objective of this technical assistance program is to strengthen the institutional capacity for fiscal management.

The objective of this technical cooperation (TC) is to support the Government of Panama for the fulfillment of the indicative conditions included in the Policy Matrix of the Program to Support Gender Equality Policies (PN-L1256), for the second operation of a series of two programmatic operations (PBP). These actions are aimed at reducing gender inequality in Panama through the effective and timely implementation of policies that increase physical, economic and decision-making autonomy for women.

The objective of this technical cooperation (TC) is to support the Government of Panama for the fulfillment of the indicative conditions included in the Policy Matrix of the Program to Support Gender Equality Policies, for the second operation of a series of two programmatic operations (PBP). These actions are aimed at reducing gender inequality in Panama through the effective and timely implementation of policies that increase physical, economic autonomy of women and public policies for gender equality.

The objective of this technical cooperation is to promote economic and social empowerment of women in Latin America and the Caribbean. In particular we want to contribute in a measurable manner to women's economic and social empowerment, and to their active and productive participation in the economy. We can do this by empowering the rural women, and the ones working or interested to join the energy sector. The specific objectives are to: (i) support the implementation and effective execution of the gender activities of the operations under execution; (ii) mainstream diversity-related analysis, actions, and results into the Bank's operations in the energy sector; (iii) Knowledge and Dissemination: Support the development of a knowledge agenda that contributes to generating data and evidence in order to disseminate the work that the Bank is doing in gender and energy.

The objective of this technical cooperation is to provide support during the preparation phase of an operation that will strengthen policies for social and productive inclusion of people with disabilities. It will focus on i) identifying physical, attitudinal, economic, normative and environmental barriers that impede the interaction of people with physical or intellectual disabilities preventing their full and effective engagement in society with equal conditions, ii) designing the policies that will permit reducing such barriers and iii) identifying possible costs and benefits associated to the implementation of such policies.

The overall objective of this Technical Cooperation (TC) is to support the Ministry of Agriculture and Livestock (MAG, by its acronym in Spanish) in the preparation of a strategy for the modernization and update of its structure to provide services to farmers and rural population in a sustainable and efficient manner. Its specific objectives are: i) review and propose modifications to the current legal framework that underpins the structure of the MAG and its relation with autonomous agencies (animal health; plant health; financial services) that comprise the public

goods supported by the Government; ii) design and implement an economic evaluation and a potential impact evaluation of these reforms and modernization process; and iii) propose an integral modernization of the technical assistance and technological transfer platform for small farmers.

This TC objective is to support Argentina in the implementation of its National Determined Contribution (NDC) and design of its long term decarbonization strategy by 2050 (LTS) with the following specific objectives: (i) facilitate engagement with national stakeholders to understand how resilient and low carbon actions can help advance sectoral and macroeconomic development goals to improve the buy-in from national stakeholders; (ii) assess options that allow improving resilience and reaching net-zero emissions inform the design of sectoral pathways to net-zero emission and prepare analytical inputs and indicators, particularly in key sectors such as agriculture/forestry, financial market, transport and energy, urban development ; (iii) map existing relevant policies and create a policy roadmap to inform relevant decisionmakers to implement the NDC and LTS and feed the policy based loan (AR-L1351) and (iv) enhance the domestic analytical capacity to deliver the NDC and LTS objectives and share lessons learnt.

This TC will provide technical support to the loan "Program to promote better working conditions in Mexico". Additionally, the TC will provide key inputs for the government for the implementation of an important labor reform.

This TC's main objective is three-fold: (i) to support Suriname's Ministry of Finance and Planning (MOFP) by increasing the capacity and knowledge of the management team in the areas of tax reform, State-Owned Enterprises (SOEs), budget planning and execution, and debt management; (ii) to improve the technical capacity of the executing agency to aid policy decision-making at the leadership level of the organization; and (iii) to support relevant activities and administrative procedures needed to execute the loan program SU-L1065. To achieve this objective, this TC will finance activities that will put in place effective policymaking conducive to regain fiscal sustainability in the medium and long term.

This Technical Cooperation (TC) has the objective to support the execution and implementation of the policy measures to be made by the Government of Chile (GdCh) for a fair, clean and sustainable energy transition; and supporting the programmatic loan operation CH-L1159.

This Technical Cooperation (TC) has the objective to support the execution and implementation of the policy measures to be made by the Government of Chile (GdCh) for a fair, clean and sustainable energy transition; and supporting the programmatic loans operations CH-L1159 and CH-L1165.

This operation will provide technical support to the Government of Panama to achieve the policy measures identified in the potential second program of the PN-L1175 programmatic series, an operation supported by this technical-cooperation operation. This TC will allow a technical in-depth study of the laws, regulations, action plans and strategies that are expected to be promoted with the second loan operation in order to contribute to improving the competitiveness of the Panamanian tourism sector.

This project seeks to improve health outcomes of migrants through increasing health insurance coverage.

To assist the reform of the State Own Enterprises (SOEs) that will be reflected in an increase in the number of SOEs aligned with the OECD principles of corporate governance and supporting the objectives of macroeconomic and fiscal stabilization of the Ecuador' Government, in particular the cost optimization reforms incorporated into the Productive Development Law and the Prosperity Plan 2018-2021. The specific objectives are: (i) to align corporate governance with the best international practices; (ii) to strengthen the fiscal regime of the SOEs to increase its efficiency; (iii) to support the design and implementation of a public information campaign on the reform of the SOEs.; and (iv) to support improvements in the efficiency and effectiveness of social spending.

To develop stable, farsighted public policies to improve transparency and integrity with digital technologies in Honduras.
